Board of Directors' report regarding internal control

The purpose of internal control of financial reporting is to provide reasonable assurance regarding quality and reliability in the external financial reporting and to ensure that the reports are prepared in accordance with accepted accounting standards, applicable laws and provisions and other requirements for listed companies. To ensure this, the Company had the COSO (Committee of Sponsoring Organizations of the Treadway Commission) framework as a starting point.

Internal control function

The Board of Directors and the Audit Committee follow up BE Group's assessment of internal control by means including discussions with BE Group's auditors. Given the above, the Board of Directors has elected not to maintain a separate internal audit unit. To test the internal control environment, a self-assessment is conducted, among other efforts, based on a Group-wide control framework. The Group's CFO reports the results of the test done of the internal control to the Audit Committee of the Board of Directors. BE Group's internal control of financial reporting covers five main areas: establishment of a control environment, risk assessment, control activities, information and communications and follow-up.

Control environment

BE Group has a simple legal and operational structure and an established governance and internal control system. This allows the organization to react quickly to external changes. Operational decisions are made at the Group or business area level, while decisions on strategy, business direction, acquisitions and general financial issues are made by the Board of Directors and Group Management of BE Group. Internal control of financial reporting at BE Group is designed to work within this organization. Clear regulations on delegation of authority and responsibilities are followed within BE Group, which follow Group structure.

Since 2012, the Board of Directors has applied a so-called "whistle blower" policy, which means that all employees have the possibility to anonymously report if they discover improprieties or illegal actions that affect vital interests for BE Group or the life and health of individual persons. The policy applies to improprieties committed by people in executive positions or other key personnel within the Company.

Risk assessment

The risk assessment is based on a risk review that is updated annually and reported to the Audit Committee. Based on the results of this review, focus is set for the internal control work in the future.

Control activities

The risks identified with regard to financial reporting are managed through the Company's control activities, such as authorization controls in IT systems and signature authentication. Detailed economic analysis of business performance including follow-up against business plans and forecasts supplements operations-specific controls and provides an overall assessment of reporting quality.

Information and communication

The Group maintains channels of information and communication that serve to safeguard completeness and accuracy in financial reporting. Policies, manuals and job descriptions are available on the Company intranet and/or in printed form.

Follow-up

The President is responsible for internal control being organized and followed up in accordance with the guidelines adopted by the Board of Directors. Financial control is exercised by the Corporate Finance Department. Financial reporting is analyzed monthly at a detailed level. The Board of Directors has followed up financial reporting at Board meetings and BE Group's auditor has reported its observations to the Board of Directors. The Board of Directors has received monthly financial reports and the Company's financial situation was discussed at every Board meeting.
